TABLE II

PUPIL PASSENGER PEDESTRIAN ACCIDENTS

	KILLED	INJURED	TOTAL
1. Pupils struck on road while approaching or leaving stopped school bus.	-	1	1
2. Pupils struck on road while approaching or leaving school bus, entering or leaving loading zone.	-	5	5

Item 1. Table II shall include those pupil passengers killed or injured by a motor vehicle other than the school bus, while the pupil is en route between bus and home, or home and bus.

Item 2. Table II shall include those pupil passengers killed or injured by a motor vehicle other than a bus.

*Definition: The problem of determining what definitions should be applied to school bus accidents is very complex. Inasmuch as the legal definition of a motor vehicle accident varies greatly from state to state, the National Safety Council's School Bus Transportation Committee recommends that all accidents be reported where the school bus is physically involved. Death or injury (involving $15.00 medical expenses per person) resulting from an accident involving a school bus passenger while he is waiting at a school bus stop, crossing the highway to board a bus, or after a pupil passenger has been discharged from a bus, and the bus is present at the scene of the accident, shall be reported.

** On Board Accidents will list pupil passengers injured by falls, striking stanchions, etc., when a bus is in motion and not involved in other accident types specifically identified. Accident must be traced to a sudden movement of the bus, such as a quick stop, start, or turn.
